Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 February 2003.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Art Unit 1713

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-30 are rejected under 35 U.S.C. § 103(a) as being unpatentable over WO 9733921.

The rejection as set forth under 35 U.S.C. § 103 in Paper No. 26 is deemed proper and is herein repeated.

Applicants argue that the instantly claimed invention incorporates a tackifying resin having a glass transition temperature of greater than 65°C or a tackifying resin which has a softening point of greater than 140°C. Applicants then point out that the Examples at page 69 utilize tackifying resins which have either glass transition temperatures or softening points which are lower than those as instantly claimed. This is not persuasive.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. § 103(a) are summarized as follows:

Art Unit 1713

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

In determining the scope and contents of the WO 9733921 document, page 23 lines 27+ identify and define the tackifier which is to be utilized within the claimed adhesive. Herein tackifiers which fall within the scope of those claimed are discussed.

The difference between the prior art and the claims at issue simply has to do with the specific selection of a tackifying resin either having a glass transition temperature of greater than 65°C or a softening point of greater than 140°C.

One of ordinary skill in the art would find it prima facie obvious to utilize a tackifying resin either having a glass transition temperature of greater than 65°C or a softening point of greater than 140°C from the prior art because these tackifying resins are suggested within the prior art. The prior art identifies tackifying resins with a softening point of being greater than 130°C as being particularly useful. See specifically page 24 lines 24+. It should be further noted that applicants' instantly claimed tackifying resins are commercially available and widely utilized tackifying resins. The prior art directs one of ordinary skill in the art to utilize commercially

Art Unit 1713

available tackifying resins and suggests resins having the properties as instantly claimed. One of ordinary skill in the art would find it prima facie obvious to utilize one of these resins and have it function in an expected manner. It should be noted that obviousness does not require absolute predictability, but rather a reasonable expectation of success.

All the objective evidence has been fully considered and has been found to not rebut the prima facie case of obviousness. There remains no showing of unexpected results when one compares the instantly claimed invention with the closest prior art of record.

THIS ACTION IS MADE FINAL. Applicants are reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a). The practice of automatically extending the shortened statutory period an additional month upon the filing of a timely first response to a final rejection has been discontinued by the Office. See 1021 TMOG 35.

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE

PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
